

WELCOME TO CHAT BOT

By: Alisha, Bryan, Joey, Shrung

What we need to implement

- A demo of the project's required functionality.
- A demo of any optional features.
- An explanation of the testing done to ensure the project works reliably.
- An audio-visual component (Powerpoint, Google Slides, Prezi, movie, etc.)
- 2 minutes of time allotted to an FAQ section of questions about the project and your implementation. Answer 2-3 questions a recruiter or business manager would be interested in.

What is ChatBot?

- ChatBot is an interactive platform that allows you to purchase good from a variety of stores and sellers and interact with them as well!
- Both sellers and customers can benefit from using our application!

DEMO
TIME!

Testing

- Tested to see if the methods work or not
- Made sure that the GUIs work
- Entered in invalid information
- Concurrency

Common FAQs

1. How is our ChatBot unique from other chat applications?
ChatBot is an application solely focused on the communication between sellers and customers, cutting out the middleman.
2. What challenges did you face while creating this application?

THANK YOU!
